Elastomer**

WORLD-LEADING SOLUTIONS

Perfect COMPOUNDS

The Birch Chemicals range empowers you to improve product quality and production output.

Created from the finest raw materials by Birch Chemicals, our products are carefully formulated for a wide range of applications. You can rely on our range for unbeatable performance and reliable consistency.

Innovative
formulations
equal
world-class
results

KEY POINTS:

- Reduces production costs
- Speeds up production time
- Consistent performance
- 100% formulation control
- Global supply
- Eco-friendly

Maximum control

Using Birch Chemicals products gives you consistent quality control, increasing the reliability of your products and the performance of your business.

Reduce costs

Adding Birch Chemicals products to your process can increase production speed and capacity, reduce revenue lost due to quality defects, and increase energy savings.

Independently assessed

Some of the biggest names in testing have independently assessed the performance of Birch Chemicals products and will verify that our products work better than the competition. Ask for copies of our technical reports to see for yourself.

Innovox[®] 97

Calcium Oxide CaO

The latest ground-breaking product from Birch Chemicals has been designed to alleviate moisture problems such as porosity or surface blisters which develop during the processing of elastomeric compounds. Innovox[®] 97 has been formulated down to the last detail, giving it world leading performance.

Innovox[®] 97 is supplied in easy to use 1kg sachets in 25kg boxes, palletted at 48 boxes per pallet - so it's as easy to access the last kg as it was the first. This revolution in packaging means Innovox[®] 97 has an extended shelf life.

Our social values

Our social values shape everything we do, and we take sustainability seriously. We are leading the way in carbon negative energy generation and zero carbon raw materials and our safety performance has won many awards.

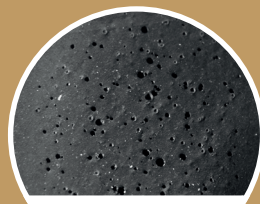

Improved quality

The Innovox® range is specially formulated to prevent visible extrusion breakout and surface defects, reducing specks, lumps and streaking in production caused by unwanted moisture in the finished product.

▼ Without using Innovox®.

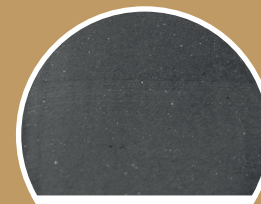

30mm diameter cord, cured for 20min at 200°C illustrating porosity due to the moisture.

Innovox[®]

Calcium Oxide CaO Sachets

Innovox[®] is the World's #1 moisture control for rubber. We use high-quality calcium oxide to eliminate porosity, visible specks and surface blisters in your rubber and polymer compounds. It disperses quickly and evenly for superior cross-link density, higher strength and acid scavenging.

Innovox[®] delivers exceptional product performance and is proven by independent testers to require 20% less product than granule alternatives. Another industry-leading solution from Birch Chemicals.

In-house innovation

We're meticulous at each step of our research, development, manufacturing and customer service. Our state-of-the-art innovation centre is an essential part of what makes Birch Chemicals so unique.

Expert knowledge

Every one of our products has been carefully developed in-house by our own scientists. They work tirelessly to innovate and find new best-solutions for industry.

Industry-leading solutions

Birch Chemicals provides industry-leading high quality products based on decades of expertise and developed from an ethos of constant innovation.

Innovoh[®]

Calcium hydroxide

Ca(OH)₂

Improve your finished FKM rubber and fluoroelastomer products with our unrivalled microfine calcium hydroxide cure additive and activator. Innovoh[®] improves the performance and consistency of FKM compounds. Innovoh's high purity and high surface area offers exceptional cure performance and dispersion without sacrificing quality.

100% of the raw materials for Innovoh[®] are produced and refined on-site, which means Birch Chemicals can offer unrivalled quality control. This product is available immediately through our worldwide network.

Immediate despatch and exceptional delivery service

Due to our worldwide distribution network we're able to offer immediate despatch for on-time delivery. We go 'the extra mile' to make sure you get what you want when you want it. Our reputation for outstanding customer service speaks for itself.

Global product, worldwide support

We work with our specialist distribution partners to offer unparalleled service and supply globally, whatever your requirement. If you want to talk rubber or plastics, coatings or adhesives just get in touch. Our distributors can speak your language - literally.

On site = speed

Our raw materials are produced and refined on site, allowing us to deliver the unbeatable quality and rapid lead times our customers expect.

Birchset™

Cure Stabiliser

Powerful cure stabiliser and compression set reduction additive specially designed for use alongside Innovox® in EPDM rubber and formulated for use in heavy humidity environments or in compounds with high volumes of fillers.

Birchset™ offers excellent mixing and dispersion characteristics. Birchset™ is typically used in combination with Innovox® in EPDM and will overcome adverse effects of using high doses of calcium oxide for moisture control in rubber compounds.

Ideal for
use in **Humid
Environments**
or **High Filler
Loadings**

Birch Chemicals Factice

A processing aid and property modifier available in standard and ultra-white grades. An essential rubber manufacturing aid, with no compromise in product quality. Used in rubber rollers and blankets, erasers, flooring mats, conveyor belts and more.

Protect rubber from moisture during shipping and transit

Because rubber compounds can absorb moisture, BirchSorb® raises the bar on moisture control, providing reliable protection whilst your compound is in transit or storage. It absorbs at least twice its weight in moisture and offers a minimum of eight weeks of protection.

Bringing innovation to market

Birch Chemicals is continuously innovating, with our product development and sourcing teams bringing new and improved products to market, so keep your eyes open for our new arrivals.
